

false\_type

```
classDiagram
    class false_type {
    }
    class extents_is_static["std::math::detail::extents_is_static< T >"] {
    }
    false_type <|-- extents_is_static
```

The diagram illustrates an inheritance relationship. At the top is a white rectangular box representing the 'false\_type' class, divided into three horizontal sections. The top section contains the text 'false\_type'. Below it is a blue arrow pointing upwards, indicating inheritance. At the bottom is a gray rectangular box representing the 'std::math::detail::extents\_is\_static< T >' class, also divided into three horizontal sections. The top section contains the text 'std::math::detail::extents\_is\_static< T >'. The arrow points from the top section of the gray box to the bottom section of the white box.

std::math::detail::  
extents\_is\_static< T >
