

false\_type

```
classDiagram
    class false_type
    class is_complex["std::math::detail::is_complex<T>"]
    is_complex --|> false_type
```

The diagram illustrates a class hierarchy. At the bottom is a gray-shaded class box for `std::math::detail::is_complex< T >`. Above it is a white class box for `false_type`. A blue arrow points from the top of the `is_complex` box to the bottom of the `false_type` box, indicating that `false_type` inherits from `is_complex`. Both boxes are divided into three horizontal sections.

std::math::detail::  
is\_complex< T >
