

`std::false_type`

The diagram illustrates a relationship between two C++ concepts. At the top is a white box representing `std::false_type`, which is divided into three horizontal sections. Below it is a gray box representing `std::math::concepts::has_scalar_divide_func`, also divided into three horizontal sections. A blue arrow points from the top of the gray box to the bottom of the white box, indicating that `std::math::concepts::has_scalar_divide_func` inherits from or specializes `std::false_type`.

`std::math::concepts`
`::has_scalar_divide`
`_func< T, S, class >`
