

std::true_type

```
classDiagram
    class std_true_type["std::true_type"]
    class std_math_detail_is_unsequenced["std::math::detail::is_unsequenced< execution::parallel_unsequenced_policy >"]
    std_math_detail_is_unsequenced --|> std_true_type
```

The diagram illustrates an inheritance relationship. At the bottom is a gray-shaded class box for `std::math::detail::is_unsequenced< execution::parallel_unsequenced_policy >`. It has three horizontal compartments: the top one contains the class name, and the two below it are empty. Above it is a white class box for `std::true_type`, also with three horizontal compartments: the top one contains the class name, and the two below it are empty. A blue arrow with an open triangular head points from the top compartment of the gray box to the bottom compartment of the white box, indicating that the gray box inherits from the white box.

std::math::detail::
is_unsequenced< execution
::parallel_unsequenced_policy >
