

false\_type

```
classDiagram
    class false_type
    class is_complex["std::math::detail::is_complex< T >"]
    is_complex --|> false_type
```

The diagram illustrates a class hierarchy. At the bottom is a gray-shaded class box for `std::math::detail::is_complex< T >`, which has three empty compartments below its name. Above it is a white class box for `false_type`, which has two empty compartments below its name. A blue arrow points from the top of the `is_complex` box to the bottom of the `false_type` box, indicating that `false_type` inherits from `is_complex`.

std::math::detail::  
is\_complex< T >
