

std::true\_type

```
graph BT; A["std::math::detail::  
is_mdspan< std::experimental  
::mdspan< T, Extents, LayoutPolicy,  
AccessorPolicy > >"] --> B["std::true_type"]
```

The diagram illustrates an inheritance relationship. A large gray box at the bottom represents the base class `std::math::detail::is_mdspan< std::experimental::mdspan< T, Extents, LayoutPolicy, AccessorPolicy > >`. A blue arrow points upwards from this box to a smaller white box at the top, which represents the derived class `std::true_type`. The white box is divided into three horizontal sections, with the top section containing the text `std::true_type`.
