

std::true_type

```
graph BT; A["std::math::concepts::has_const_row_type<T, ::std::enable_if_t<::std::is_same_v<typename T::const_row_type, typename T::const_row_type>>>"] --> B["std::true_type"]
```

The diagram illustrates an inheritance relationship. At the bottom is a large gray box containing the definition of `std::math::concepts::has_const_row_type`. A blue arrow points from the top of this box to a white box above it. The white box is divided into three horizontal sections; the top section contains the text `std::true_type`, while the two bottom sections are empty.

```
std::math::concepts
::has_const_row_type
< T, ::std::enable_if
_t< ::std::is_same_v<
typename T::const_row
_type, typename T::const
_row_type > > >
```
