

`std::false_type`

```
graph BT; A["std::math::concepts::has_scalar_pre_multiply_func< T, S, class >"] --> B["std::false_type"]; style A fill:#808080,stroke:#333,stroke-width:1px; style B fill:#fff,stroke:#333,stroke-width:1px;
```

The diagram illustrates an inheritance relationship. At the bottom is a gray rectangular box representing the base class `std::math::concepts::has_scalar_pre_multiply_func< T, S, class >`. It is divided into three horizontal sections, with the first section containing the class name. A blue arrow points upwards from the top edge of this box to the bottom edge of a white rectangular box above it. The white box represents the derived class `std::false_type` and is also divided into three horizontal sections, with the top section containing its name.

`std::math::concepts  
::has_scalar_pre_multiply  
_func< T, S, class >`
