

std::false\_type

```
graph BT; A["std::math::concepts::has_writable_column_vector_type< T, class >"] --> B["std::false_type"]
```

The diagram illustrates an inheritance relationship. At the bottom is a gray box representing the base class `std::math::concepts::has_writable_column_vector_type< T, class >`. A blue arrow points upwards from this box to a white box at the top representing the derived class `std::false_type`. The white box is divided into three horizontal sections, with the top section containing the class name.
