

std::true_type

```
classDiagram
    class std_true_type["std::true_type"]
    class std_math_detail_is_mdspan["std::math::detail::is_mdspan< ::std::experimental::mdspan< T, Extents, LayoutPolicy, AccessorPolicy > >"]
    std_math_detail_is_mdspan --|> std_true_type
```

The diagram consists of two class boxes. The top box, labeled 'std::true_type', has three horizontal compartments: the top one contains the text, and the two below are empty. The bottom box, labeled 'std::math::detail::is_mdspan< ::std::experimental::mdspan< T, Extents, LayoutPolicy, AccessorPolicy > >', has three horizontal compartments: the top one contains the text, and the two below are empty. A blue arrow with an open triangular head points from the top edge of the bottom box to the bottom edge of the top box, indicating inheritance.

std::math::detail::
is_mdspan< ::std::experimental
::mdspan< T, Extents, LayoutPolicy,
AccessorPolicy > >
