

`std::true_type`

```
graph BT; A["std::math::detail::is_homogeneous_tuple<::std::tuple<size_type...>>"] --> B["std::true_type"]
```

The diagram illustrates an inheritance relationship. At the bottom is a gray box representing the base class `std::math::detail::is_homogeneous_tuple<::std::tuple<size_type...>>`. A blue arrow points from the top of this box to the bottom of a white box above it, which represents the derived class `std::true_type`. The white box has three horizontal sections, with the top section containing the text `std::true_type`.

`std::math::detail::  
is_homogeneous_tuple  
< ::std::tuple< size  
_type... > >`
