

`std::false_type`

The diagram illustrates a C++ concept specialization. At the top is a white box representing the `std::false_type` concept. Below it is a blue arrow pointing upwards, indicating a specialization. At the bottom is a gray box representing the `std::math::concepts::has_matrix_multi_func` concept. The gray box contains the text `std::math::concepts::has_matrix_multi_func < T, class >` in its top section, with two empty gray sections below it.

`std::math::concepts
::has_matrix_multi_func
< T, class >`
