

false_type

```
classDiagram
    class false_type {
    }
    class is_complex["std::math::detail::is_complex< T >"] {
    }
    is_complex --|> false_type
```

The diagram illustrates a class hierarchy. At the bottom is a gray-shaded class box for `std::math::detail::is_complex< T >`. It has three horizontal compartments: the top one contains the class name, and the two below are empty. Above it is a white class box for `false_type`, also with three horizontal compartments: the top one contains the class name, and the two below are empty. A blue arrow points from the top of the `is_complex` box to the bottom of the `false_type` box, indicating that `is_complex` inherits from `false_type`.

std::math::detail::
is_complex< T >
