

std::true_type

```
classDiagram
    class std_true_type["std::true_type"]
    class std_math_detail_is_unsequenced["std::math::detail::is_unsequenced<execution::unsequenced_policy>"]
    std_math_detail_is_unsequenced --|> std_true_type
```

The diagram consists of two class boxes. The top box, labeled 'std::true_type', has two empty rectangular compartments below its name. The bottom box, labeled 'std::math::detail::is_unsequenced<execution::unsequenced_policy>', has two shaded rectangular compartments below its name. A blue arrow with an open triangular head points from the top edge of the bottom box to the bottom edge of the top box, indicating a generalization (inheritance) relationship.

std::math::detail::
is_unsequenced< execution
::unsequenced_policy >
