

`std::false_type`

```
graph BT; A["std::math::concepts::has_get_allocator_func< T, class >"] --> B["std::false_type"]
```

The diagram illustrates an inheritance relationship. At the bottom is a gray rectangular box representing the base class, containing the text `std::math::concepts::has_get_allocator_func< T, class >`. A blue arrow points upwards from the top center of this box to the bottom center of a white rectangular box above it. The white box represents the derived class, `std::false_type`, and is divided into three horizontal sections by two lines.

`std::math::concepts  
::has_get_allocator  
_func< T, class >`
