

std::true_type

```
classDiagram
    class std_true_type["std::true_type"]
    class std_math_detail_is_homogeneous_tuple["std::math::detail::is_homogeneous_tuple<tuple<size_type...>>"]
    std_math_detail_is_homogeneous_tuple --|> std_true_type
```

The diagram consists of two class boxes. The top box, labeled 'std::true_type', is divided into three horizontal sections: the top section contains the text 'std::true_type', and the two bottom sections are empty. The bottom box, labeled 'std::math::detail::is_homogeneous_tuple<tuple<size_type...>>', is divided into three horizontal sections: the top section contains the text 'std::math::detail::is_homogeneous_tuple<tuple<size_type...>>', and the two bottom sections are empty. A blue arrow points from the top section of the bottom box to the bottom section of the top box, indicating an inheritance relationship.

std::math::detail::
is_homogeneous_tuple
< tuple< size_type... > >
